

INTERNATIONAL COUNCIL OF BIOTECH ASSOCIATIONS (ICBA)

BIOTECHNOLOGY EMPOWERS ECONOMIES TO ACHIEVE THE UN SUSTAINABLE DEVELOPMENT GOALS

Embracing biotechnology innovation can lead to breakthroughs such as:

- Cure once incurable diseases
- Enable rapid response to health crises
- Improve plant health to withstand environmental stress to enhance food security
- Promote animal health
- Address antimicrobial resistance
- Reduce greenhouse gases
- Develop food ingredients that provide micronutrients and fortified food solutions to help end hunger

The International Council of Biotechnology Associations (ICBA) is committed to working with its national authorities and international organizations to enable the tools of biotechnology to overcome global challenges.
